HIVE & PLEATED COLLECTION

OUR NEW AQUARIUS HIVE & PLEATED COLLECTION IS HERE!

With over 170 fabrics to choose from, Hive & Pleated are a versatile, practical and stylish option for windows and doors. Choose from Blackout, standard or sheer fabrics types, as well as a wide range of fitting options.

Explore our brochure for more information on both Hive & Pleated blinds, control options, motorisation, recycled fabrics and more!

FEATURES & BENEFITS

The fabrics within this collection are not only aesthetically pleasing, they also boast a range of extra performance properties.

Solar reflective: Both our Pleated and Hive fabrics have solar reflective properties, helping to reduce the temperature in warm and sunny rooms.

Blackout: We offer a wide range of blackout fabrics, ideal for bedrooms and helping to ensure a better night's sleep. Choose fabrics with a foil insert for enhanced blackout performance.

Fire retardant: We offer a wide range of fire-retardant fabrics, ideal for commercial and residential settings where added safety is required.

Anti-static: Say goodbye to dusty blinds, our anti-static fabrics help repel dust, keeping blinds fresher for longer.

Moisture resistant: Our moisture-resistant fabrics help prevent damp and mould, making them the perfect solution for kitchens and bathrooms.

Thermal Properties: Our Hive fabrics offer thermal insulation and heat-blocking ratings up to A++, helping keep rooms cool in summer and warm in winter.

PLEATED BLINDS

Pleated blinds are crafted from a single piece of fabric, folded into crisp, concertina-like pleats. This design offers a sleek, compact structure with a very small stack size, making them ideal for a variety of window shapes.

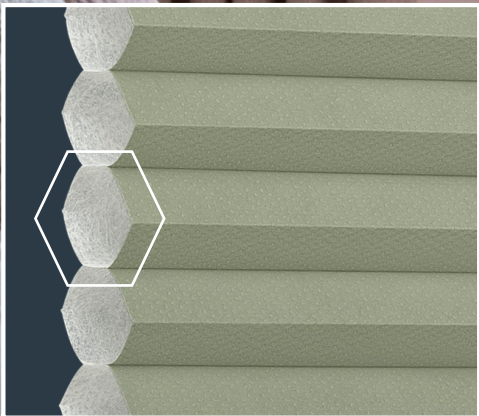

Lightweight and flexible, they provide effective shading with a broad selection of fabrics and colours, suitable for everyday light control across most window types. They also have solar reflective properties help reduce heat and glare, ensuring comfort and style in any room.

WHY CHOOSE PLEATED BLINDS?

- Our Pleated blinds range includes 85 fabrics, with a wide range of patterns, plains and textures to choose from.
- Pleated blinds are a stylish and practical choice that's compact and sleek, and they can be made to fit shaped windows, including conservatory roofs.
- Solar reflective and sun shading fabrics can help reduce the temperature in warm and sunny rooms, like conservatories, garden rooms and rooms with large glass expanses, to create a comfortable year-round temperature.
- Electric options are available for conservatory roof blinds for a quick and convenient way to control shading levels.

Clever insulating honeycomb design traps warmth in during winter helping to reduce heat loss at your windows.

HIVE BLINDS

Hive blinds use clever honeycomb cells to create an insulating barrier at your windows, preventing cold air from entering and warm air from escaping. With both manual and electric control options available, Hive blinds are perfect for any room, including conservatories and large glass expanses.

WHY CHOOSE HIVE BLINDS?

- Our Hive range has 68 fabrics to choose from, with a wide range of stylish printed and plain designs available.
- Hive blinds are an energy efficient choice, helping to regulate the temperature thanks to clever honeycomb cells that create a barrier at the window and help stop cold air entering and warm air escaping. Each fabric has its own energy-efficiency rating, ranking its heat blocking, heat insulating and solar reflecting properties – all of our Hive fabrics are rated from A to A++.
- The delicate honeycomb fabric folds into a compact stack, with a clever design that sits discreetly above windows and doors for a streamlined, elegant look.
- Hive blinds can be made electric with Somfy motors, allowing effortless control of single or multiple blinds.

PERFECT FOR COMPACT SPACES

Our unique INTU® Micro system is ideal for smaller windows and doors where you might struggle to fit a blind — such as bi-fold doors and compact window frames.

Designed to fit seamlessly within the window frame, INTU® Micro blinds move effortlessly with your windows and doors. This makes them perfect for tilt-and-turn windows, patio doors and conservatories, maintaining a sleek, integrated look.

Did you know

INTU® hive and pleated blinds can be fitted to windows and doors without drilling the frames.

CONTROL OPTIONS

FREEHANG

Our standard free hanging blinds are a versatile choice, suitable for most common window types. They can be fitted either inside or outside the window recess, and can be operated with either a simple cord or a child-safe tab. Freehand blinds can also be motorised for complete convenience in the home.

TRANSITION

For the softness of a sheer fabric during the day, and the privacy of a blackout fabric in the evening, our Transition blinds are the ideal choice. With two fabric choices in a single blind, they provide the best of both worlds. Both fabrics are operated by a manual tab, and have tension cords running down each side so you can position the blinds in exactly the right point you need.

TRILITE

If you need greater control over light and privacy, our Trilite blinds are an excellent option. These allow the blind to be positioned exactly where its needed, offering flexibility and convenience. Trilite operate with a simple tab, with two tension cords running down each side of the blind, so you can position the blind in exactly the right place to diffuse the sunlight.

SHAPED WINDOWS

We have specialised systems to cater for the increasingly popular shaped windows, like roof blinds, roof lanterns, skylights and large shaped windows. With manual and electric options available, we can cater our specialised systems for unique requirements.

PERFECT FIT AND INTU®

Our perfect fit and INTU® Micro Blinds have smaller pleats and cells that are designed to fit neatly within the window frame allowing windows and doors to be operated with the blinds in place. Our systems allows the blinds to move smoothly with windows and doors, making them ideal for tilt-and-turn windows, patio doors, and conservatories, while maintaining a sleek, integrated look.

CONSERVATORIES

We offer a wide range of Hive® and Pleated blinds, ideal for conservatories. The solar reflective properties of pleated fabrics help keep rooms cool in summer, while the innovative honeycomb design of hive blinds traps air in winter to help retain warmth.

MOTORISED HIVE AND PLEATED

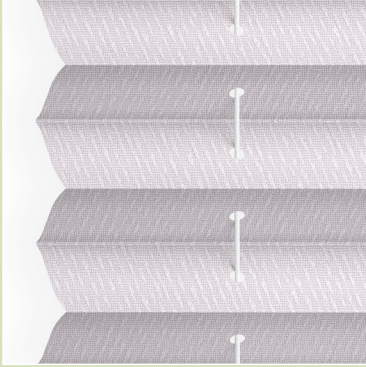

For added ease, many of our Hive and Pleated blinds can be motorised using our market-leading Somfy motors, providing effortless operation – particularly useful for windows that are hard to reach or for large glass expanses with multiple blinds.

Motorised options are available on the following:

	Side blinds	Roof blinds	Roof lanterns
Hive	✓	✓	✓
Pleated		✓	✓

RECYCLED FABRICS

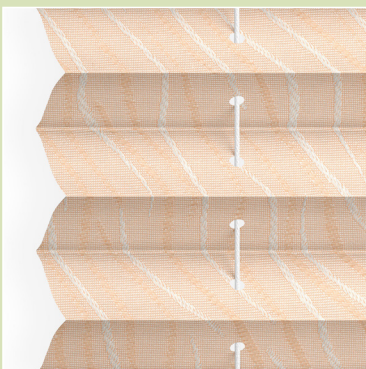

Looking for a more sustainable fabric choice? 75% of our new Pleated range is made from recycled polyester, meaning that less water and energy is used within the fabrics production, contributing to fewer emissions. Look for the recycled logo across our fabric range to find more sustainable choices.
